CONTENTS OF VOLUME 47

PART 1 (March 1991)

Utilisation de données intermédiaires pour corriger la prédiction de modèles mécanistes
R. Faivre, B. Goffinet, et D. Wallach 1

Increasing precision or reducing expense in regression experiments by using information from a concomitant variable ... B. Engel and P. Walstra 13

Extension of Dunnett's multiple comparison procedure to the case of several groups
S. H. Cheung and B. Holland 21

Generalized variance component models for clustered categorical response variables
M. E. Miller and J. R. Landis 33

Multiple comparisons for analyzing dichotomous response ... W. W. Piegorsch 45

On estimating HLA/disease association with application to a study of aplastic anemia
S. G. Self, G. Longton, K. J. Kopecky, and K.-Y. Liang 53

Selecting an efficient design for assessing exposure–disease relationships in an assembled cohort
S. Wacholder, M. Gail, and D. Pee 63

On dependent repeated screening tests ... T. Lau 77

Sensitivity analysis for matched case–control studies ... P. R. Rosenbaum 87

The problem of a covariate–time qualitative interaction in a survival study
J. O'Quigley and F. Pessione 101

Nonparametric tests of association between survival time and continuously measured covariates: The logit-rank and associated procedures ... J. O'Quigley and R. L. Prentice 117

Running average analysis of clinical trial ambulatory blood pressure data
M. R. Crager and M. A. Reitman 129

Characterization of dose–response relationships inferred by statistically significant trend tests
R. L. Kodell and J. J. Chen 139

Tests and model selection for the general growth curve model ... J. C. Lee 147

Unequally spaced longitudinal data with AR(1) serial correlation ... R. H. Jones and F. Boadi-Boateng 161

Estimation of spermarche from longitudinal spermaturia data
M. Jørgensen, N. Keiding, and N. E. Skakkebæk 177

Reduction of selection differentials in finite populations with a nested full-half sib family structure
T. H. E. Meuwissen 195

Multistage index selection in finite populations ... L. Norell, T. Arnason, and K. Hugason 205

A random field approach to the analysis of field-plot experiments and other spatial experiments
D. L. Zimmerman and D. A. Harville 223

A bivariate distribution approach to modeling forest diameter distributions at two points in time
B. R. Knoebel and H. E. Burkhart 241

Quantifying precision of mark–recapture estimates using the bootstrap and related methods
S. T. Buckland and P. H. Garthwaite 255

A nonparametric approach to size-biased line transect sampling ... P. X. Quang 269

Shorter Communications

A nonproportional hazards Weibull accelerated failure time regression model ... K. M. Anderson 281

Repeated confidence intervals for a scale change in a sequential survival study
D. Y. Lin and L. J. Wei 289

Estimating relative potency using prior information ... P. T. Kim, E. M. Carter, and J. J. Hubert 295

Robustness and balance in the mixed model ... D. M. Rocke 303

Detecting cluster in a heterogeneous community sampled by quadrats ... A. R. Solow and W. Smith 311

Estimating standardized risk differences from odds ratios ... S. Greenland and P. Holland 319

The Consultant's Forum

Reader Reaction: Predictive probability in clinical trials ... A. P. Grieve 323

Response ... S. C. Choi and P. A. Pepple 330

Ethical aspects of statistical practice ... D. J. Finney 331

Correspondence ... 341

Book Reviews ... 345

Corrections ... 357

Papers to be published ... 359

PART 2 (June 1991)

The 2 × 2 matched-pairs trial: Exact unconditional design and analysis ..... S. Suissa and J. J. Shuster 361
A jackknife estimator of a combined odds ratio ..... I. Pigeot 373
Robust estimation of the variance in moment methods for extra-binomial and extra-Poisson variation ..... D. F. Moore and A. Tsiatis 383
Modelling sub-binomial variation in the frequency of sex combinations in litters of pigs ..... R. J. Brooks, W. H. James, and E. Gray 403
Robustness of the SPRT for a negative binomial to misspecification of the dispersion parameter ..... D. J. Hubbard and O. Brian Allen 419
The analysis of the variance and covariance of products ..... D. Brown and N. Alexander 429
Two-sample tests with multinomial or grouped failure time data ..... J. A. Cook and J. F. Lawless 445
Regression with frailty in survival analysis ..... C. A. McGilchrist and C. W. Aisbett 461
A Monte Carlo method for Bayesian inference in frailty models ..... D. G. Clayton 467
A comparison of exact, mid-*P*, and score tests for matched case–control studies ..... K. F. Hirji 487
Fitting logistic regression models in stratified case–control studies ..... A. J. Scott and C. J. Wild 497
Procedures for two-sample comparisons with multiple endpoints controlling the experimentwise error rate ..... W. Lehmacher, G. Wassmer, and P. Reitmeir 511
Nonparametric analysis of covariance for comparing change in randomized studies with baseline values subject to error ..... J. D. Knoke 523
Effects of exposure misclassification on regression analyses of epidemiologic follow-up study data ..... S. J. Reade-Christopher and L. L. Kupper 535
Regression with bivariate grouped data ..... D. F. Heitjan 549
On the calibration problem extended to nonlinear models ..... J. R. Schwenke and G. A. Milliken 563
Universal kriging and cokriging as a regression procedure ..... A. Stein and L. C. A. Corsten 575
Disease clustering in time ..... D. J. Best and J. C. W. Rayner 589
The validity of inferences based on incomplete observations in disease state models ..... J. Grüger, R. Kay, and M. Schumacher 595
Detection of two-component mixtures of lognormal distributions in grouped, doubly truncated data: Analysis of red blood cell volume distributions ..... C. E. McLaren, M. Wagstaff, G. M. Brittenham, and A. Jacobs 607
Application of nonlinear models with random coefficients to growth data ..... M. J. Palmer, B. F. Phillips, and G. T. Smith 623
A multivariate growth curve model for pregnancy ..... S. Lundbye-Christensen 637
Detecting influential measurements in a growth curves model ..... E. P. Liski 659
Modeling the effect of dose on the lifetime tumor rate from an animal carcinogenicity experiment ..... D. M. Finkelstein 669
Constant risk differences in the analysis of animal tumorigenicity data ..... G. E. Dinse 681
The effect of responsive movement on abundance estimation using line transect sampling ..... B. J. Turnock and T. J. Quinn II 701
Optimum size of sampling unit for estimating the density of marine populations ..... M. Pennington and J. H. Vølstad 717
Some practical aspects of a conditional likelihood approach to capture experiments ..... R. M. Huggins 725

Shorter Communications

The five-degree-of-freedom rule of thumb for fixed-width confidence intervals for a normal mean ..... D. Edelman 733
A new discriminant technique—Bayes–Fisher discrimination ..... X.-N. Huang and B.-B. Li 741
On the choice of times for data analysis in group sequential clinical trials ..... Z. Li and N. L. Geller 745
Tests of homogeneity for the relative risk in multiply-matched case–control studies ..... D. Zelterman and C. T. Le 751

The Consultant's Forum

Two guidelines for bootstrap hypothesis testing ..... P. Hall and S. R. Wilson 757
The effect of screening on some pretest–posttest test variances ..... D. A. Follmann 763
Reader Reaction: Reducing mean squared error in the analysis of stratified epidemiologic studies ..... S. Greenland 773
Response ..... L. A. Kalish 776
Correspondence 777
Book Reviews 781
Papers to be published 793

PART 3 (September 1991)

A comparison of several point estimators of the odds ratio in a single 2 × 2 contingency table
S. D. Walter and R. J. Cook 795
Analysis of repeated-measurements data from randomized block experiments
B. Schaalje, J. Zhang, S. G. Pantula, and K. H. Pollock 813
Estimating equations for parameters in means and covariances of multivariate discrete and continuous responses ..... R. L. Prentice and L. P. Zhao 825
Diagnostic plots in Cox's regression model ..... C. H. Chen and P. C. Wang 841
Cost-efficient study designs for binary response data with Gaussian covariate measurement error
D. Spiegelman and R. Gray 851
Bayesian subset analysis ..... D. O. Dixon and R. Simon 871
Fitting mixture models to birth weight data: A case study ..... H. Oja, M. Koiranen, and P. Rantakallio 883
A model for incorporating historical controls into a meta-analysis ..... C. B. Begg and L. Pilote 899
A statistical method for the comparison of a discrete diagnostic test with several continuous diagnostic tests ..... C. A. Beam and H. S. Wieand 907
The design of a panel study under an alternating Poisson process assumption
P. S. Albert and C. H. Brown 921
Modelling the influence of risk factors on familial aggregation of disease ..... O. O. Aalen 933
Nonparametric estimation of the incubation period of AIDS based on a prevalent cohort with unknown infection times ..... P. Bacchetti and N. P. Jewell 947
A generalized stochastic model for the analysis of infectious disease final size data
C. L. Addy, I. M. Longini, Jr., and M. Haber 961
An adaptive weighted log-rank test with application to cancer prevention and screening trials .. S. G. Self 975
Nonparametric estimation of the size–metastasis relationship in solid cancers
M. Kimmel and B. J. Flehinger 987
Modelling adolescent blood pressure patterns and their prediction of adult pressures
C. S. Berkey, N. M. Laird, I. Valadian, and J. Gardner 1005
A clonal selection based timecourse model for antibody responses to killed vaccine, with applications to foot and mouth disease ..... P. J. Hingley 1019
Analysis of trinomial responses from reproductive and developmental toxicity experiments
J. J. Chen, R. L. Kodell, R. B. Howe, and D. W. Gaylor 1049
Pooling data for stability studies: Testing the equality of batch degradation slopes
S. J. Ruberg and J. W. Stegeman 1059
Estimating drug shelf-life with random batches ..... S.-C. Chow and J. Shao 1071
A martingale estimating equation for a capture–recapture experiment in discrete time ..... P. Yip 1081
A line transect model for aerial surveys ..... P. X. Quang and R. B. Lanctot 1089
Adaptive cluster sampling: Designs with primary and secondary units ..... S. K. Thompson 1103
A semi-Markov model for insect life history data ..... P. L. Munholland and J. D. Kalbfleisch 1117
A numerical solution to the equilibria of the two-locus two-allele selection model
J.-C. Renaud and J. R. Morton 1127

Shorter Communications
Residual plots for log odds ratio regression models ..... M. Tsujitani and G. G. Koch 1135
The likelihood ratio test for the two-component normal mixture problem: Power and sample size analysis ..... N. R. Mendell, H. C. Thode, Jr., and S. J. Finch 1143
A nonparametric estimator of the shift effect for repeated observations ..... E. Brunner 1149
Second-order analysis of spatial clustering for inhomogeneous populations
P. J. Diggle and A. G. Chetwynd 1155
Elementary methods of cohort analysis with several exposure levels ..... T. Sato 1165

The Consultant's Forum
Reader Reaction: Algorithms versus models for analyzing data that contain misclassification errors
A. Ekholm 1171
Response ..... M. A. Espeland and S. L. Hui 1177
Reader Reaction: Testing hierarchical treatment components in analysis of covariance ... A. A. Rayner 1183
Response ..... C. Bingham and S. E. Fienberg 1189
Correspondence 1193
Book Reviews 1199
Papers to be published 1207
The Biometric Society 1209

PART 4 (December 1991)

Practical implications of modes of statistical inference for causal effects and the critical role of the assignment mechanism ..... D. B. Rubin 1213
Estimation of relative potency with sequential dilution errors in radioimmunoassay ..... A. Racine-Poon, C. Weihs, and A. F. M. Smith 1235
Attributable risk estimation from case–control data via logistic regression ..... K. Drescher and W. Schill 1247
Logistic regression for clustered binary data in proband studies with application to familial aggregation of sleep disorders ..... T. D. Tosteson, B. Rosner, and S. Redline 1257
A goodness-of-fit test for binary regression models, based on smoothing methods ..... S. le Cessie and J. C. van Houwelingen 1267
Local full likelihood estimation for the proportional hazards model ..... R. Gentleman and J. Crowley 1283
Applications of multiple imputation to the analysis of censored regression data ..... G. C. G. Wei and M. A. Tanner 1297
Evaluation of exact and asymptotic interval estimators in logistic analysis of matched case–control studies ..... S. E. Vollset, K. F. Hirji, and A. A. Afifi 1311
Using replicate observations in observer agreement studies with binary assessments ..... S. G. Baker, L. S. Freedman, and M. K. B. Parmar 1327
Tests of independence for bivariate data with random censoring: A contingency-table approach ..... M. G. Akritas and C. C. Clogg 1339
Analysis of longitudinal data with unmeasured confounders ..... M. Palta and T.-J. Yao 1355
A two-state Markov mixture model for a time series of epileptic seizure counts ..... P. S. Albert 1371
Sample size calculations for two-group repeated-measures experiments ..... J. Rochon 1383
Exact statistical inference for group sequential trials ..... D. Y. Lin, L. J. Wei, and D. L. DeMets 1399
Determining stratum boundaries with multivariate real data ..... L. Pla 1409
Modelling digit preference in fecundability studies ..... M. S. Ridout and B. J. T. Morgan 1423
Agricultural response surface experiments based on four-level factorial designs ..... R. N. Edmondson 1435
Spatial analysis of field experiments—an extension to two dimensions ..... B. R. Cullis and A. C. Gleeson 1449
Competing effects designs and models for two-dimensional field arrangements ..... W. T. Federer and K. E. Basford 1461
The empirical efficiency and validity of two neighbour models ..... D. Baird and R. Mead 1473
Mixture models for continuous data in dose–response studies when some animals are unaffected by treatment ..... D. D. Boos and C. Brownie 1489
A new index of aggregation for animal counts ..... J. N. Perry and M. Hewitt 1505
Estimation of von Bertalanffy growth curve parameters from recapture data ..... I. R. James 1519
Change-in-ratio estimators for populations with more than two subclasses ..... M. S. Udevitz and K. H. Pollock 1531
Estimation of circadian activity pattern when the beginning and end of active periods are not always observable ..... H. J. Vivás and S. Engen 1547
Shorter Communications
On maximally selected chi-square statistics ..... J. A. Koziol 1557
Efficiency of cohort sampling designs: Some surprising results ..... B. Langholz and D. C. Thomas 1563
A note on the conditional approach to interval estimation in the calibration problem ..... J. J. Lee 1573
The Consultant's Forum
A statistical model for in-vitro assessment of patient sensitivity to cytotoxic drugs ..... S. Minkin 1581
Reader Reaction: The interpretation of a regression coefficient ..... J. I. Galbraith 1593
Response ..... S. L. Zeger, K.-Y. Liang, and P. S. Albert 1595
Reader Reaction: Confidence intervals and sample sizes ..... A. P. Grieve 1597
Response ..... S. L. Beal 1602
Reader Reaction: Generalized linear models for enzyme-kinetic data ..... J. A. Nelder 1605
Response ..... D. Ruppert, N. Cressie, and R. J. Carroll 1610
Reply ..... J. A. Nelder 1614
Rejoinder ..... D. Ruppert, N. Cressie, and R. J. Carroll 1615
Reader Reaction: Testing for random dropouts in repeated measurement data ..... M. S. Ridout 1617
Response ..... P. J. Diggle 1619
